**RE: APPLICATION FOR SUPPORT ON CONSTRUCTION OF SCHOOL PERIMETER WALL
AND WATER DRAINAGE SYSTEM**

Elimu Ya Kenya School has been a success since its inception in the year 2010. Parents, children, community and Education4kenya has had a great corporation.

The School however is not in a position to safeguard and meet all its development costs.

Through our partner Organisation Education4kenya, we seek aid from your esteemed ministry n the following ways.

1. Construction of the water drainage System: The existing drainage System is very poor such that rain water adversely affects the buildings and the playing fields
2. Construction of a wall around the school: The safety of the children in school, the security of the buildings and equipments in the school is also at stake

Your support is greatly welcomed and we look forward to your positive consideration.

Yours Faithfully

Lilian Tari usungu
