RE: FUNDING FOR CONSTRUCTION OF SCHOOL PERIMETER WALL AND WATER DRAINAGE SYSTEM

On behalf of the Department of Education and Children County government of Mombasa, I write to support the noble initiative of application for funding for construction of a wall around Elimu Ya Kenya school- Altenburgerland and the water drainage system within the school.

The School has over the years improved its facilities so much such that it has brought positive development in the area in support of dignified care for our children. However, the school faces two major challenges.

1. For protection and proper care of the children in school, buildings and equipment, it is very important that we construct a perimeter wall around the school.
2. The region is affected by flooding whenever there are heavy rains which badly affects the school buildings. The drainage system of the school is poor.

We kindly request that you approve the application.

Faithfully,

Bwanaheri A. Salim

For Chief Officer,

Department of Education and Children,

County Government of Mombasa.
